jointly to be referred to as: 'parties' and individually to be referred to as: 'party'.

A. Recitals

1. The parties want to demonstrate their commitment to further enhancing the stability, security and interoperability of the Internet's Domain Name System (DNS) from a global perspective and for the benefit of the local and global Internet community in an evolutionary manner on the basis of a peer relationship.
2. The [.] Top Level Domain and has been delegated to [ccTLD] in [year] and [ccTLD] is [legal status in country] and executes its operation in [country].
3. [ccTLD] functions regarding the stability and interoperability of the DNS are to:
 1. Maintain and keep maintained name servers for the [.] domain;
 2. Generate updates to .[] zone data when changes occur and propagate those changes to all public authoritative name servers for the .[] domain; and
 3. Ensure continued and stable domain name system interoperability with the global Internet.
4. ICANN is responsible for providing technical-coordination functions for the management of the system of unique identifiers of the global Internet, including the DNS. Among ICANN's responsibilities is to oversee operation of the Internet's Authoritative Root Server System. As part of ICANN's responsibilities ICANN enters and maintains data in the Authoritative Root database and generates updates of the root zone file.
5. ICANN:
 - a) Coordinates the allocation and assignment of the three sets of unique identifiers for the Internet, which are:
 1. domain names (forming a system referred to as "DNS");
 2. Internet protocol ("IP") addresses and autonomous system ("AS") numbers; and
 3. Protocol port and parameter numbers.
 - b) Coordinates the operation and evolution of the DNS root name server system.
 - c) Coordinates policy development reasonably and appropriately related to these technical functions.

B. Mutual Recognition

1. **Recognition of [ccTLD].** ICANN recognizes [ccTLD] as the manager and sponsoring organization of the [.] Top Level Domain, and the entity responsible for maintaining the [.] Top Level Domain, as a stable and interoperable part of the global domain naming system for the Internet in a manner that is consistent with [country] national law and public policy and naming policy.

2. **Recognition of ICANN.** The ccTLD Manager acknowledges that ICANN is the entity responsible for maintaining and keeping the root of the Internet DNS stable and globally interoperable in a manner that is consistent with ICANN's Mission and Core Values as reflected in its bylaws.

C. Commitments
