	01018958	3/20/2021	<p>REPORTED REGISTRAR Net4 India Limited</p> <p>DESCRIPTION</p> <p>I have been the owner of the domain name kanvic.org for over last 10 years. The domain was registered with the registrar Net4 and was renewed every year since the first registration. Last year, as our team moved to their homes because of the COVID pandemic during the period when renewal became due, we could not renew the domain name in time and it was put for redemption. During that period, we contacted the registrar multiple times through email, phone and online complaint registration on their website but they did not respond. Eventually, the domain name was removed from our account on the Net4 website but it seems to have been renewed by the registrar themselves. The domain is still in the name of Kanvic but we are denied the right to access it. Your help in this case would help us get out of this situation.</p>
