Registration Data Request Service

System Development Update

ICANN

Webinar #1: 16 May from 13:00-14:30 UTC
Webinar #2: 17 May from 03:00-04:30 UTC

Agenda

- Brief Background and High-Level Timeline

- Requestor System Development Showcase

  - Q&A

- Registrar System Development Showcase

  - Q&A

Brief Background and High-Level Timeline

Diana Middleton

Brief Background

- In February 2023, the ICANN Board of Directors passed a resolution directing ICANN org to develop and launch a new ticketing system to handle requests for access to nonpublic registration data related to gTLDs.

- ICANN org immediately began work on developing the Registration Data Request Service (RDRS), formally known as the WHOIS Disclosure System.

- The RDRS will be operated by ICANN org for a period of up to 2 years with periodic check-ins with the GNSO Council to discuss usage and data collection resulting from the service.

- This work is expected to inform next steps on the Phase 2 Recommendations of the Expedited Policy Development Process on the Temporary Specification for gTLD Registration Data for a System for Standardized Access/Disclosure (SSAD).
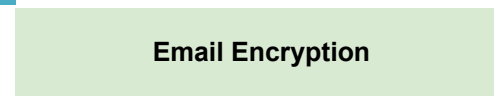

High Level Timeline

Project Kickoff

Webinar #1

Webinar #2

Registrar Early Access

Webinar #3

Public Launch

Q1		Q2			Q3			Q4		
Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Today

Simple End-to-End

(full process from start to finish)

Bulk Processing

(feature that allows user to apply one operation to several assignments or cases)
